

# Future Internet in European Research

Fast moving – but maybe still too slow !!

**EURESCOM**

# What is the Internet?

- \* The Internet is a **global system of interconnected computer networks** that use the standard Internet protocol suite (TCP/IP) to link **several billion devices** worldwide.
- \* It is a **network of networks** that consists of millions of private, public, academic, business, and government networks, of local to global scope, that are linked by a **broad array of electronic, wireless, and optical networking technologies**.
- \* The Internet carries an **extensive range of information resources and services**, such as the inter-linked hypertext documents and applications of the World Wide Web (WWW), the infrastructure to support email, and peer-to-peer networks for file sharing and telephony.

# Where to invest?

Generic  
Enablers & Use  
case service  
developments

Service  
Development  
Environment &  
Use case  
experimental  
sites

Use case and  
test site  
expansion,  
SME  
involvement,

European  
Future  
Internet  
2020

Large scale demonstration  
trials and scalability tests

Pilots of network mgt. and  
operation, cloud-based  
distributed computing and  
big data for networks

Detailed system design,  
optimisation, and  
development.  
Large validation trials

New Network Architectures,  
New technologies and new  
operational paradigms,

FUTURE  
INTERNET  
PPP

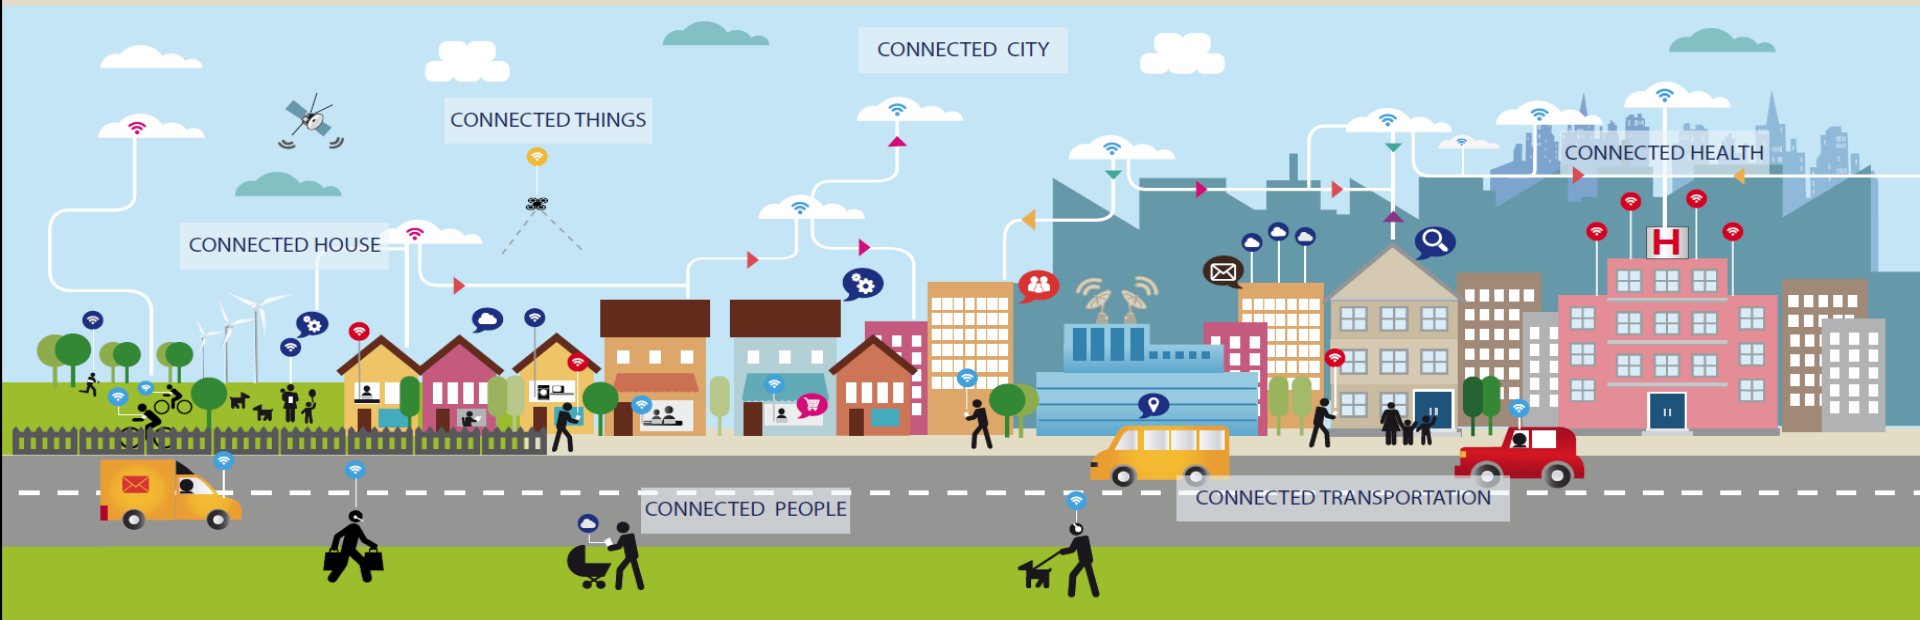

The next generation of communication networks  
will be “Made in EU”

[www.5g-ppp.eu](http://www.5g-ppp.eu)

## The 5G Infrastructure Public-Private Partnership

**THE 5G PPP**

# The 5G Infrastructure Public-Private Partnership

Industry manufacturers

Telecommunications operators

Service providers

SMEs

Researchers

The 5G PPP will deliver solutions, architectures, technologies and standards for the ubiquitous next generation communication infrastructures of the coming decade.

REINFORCE INDUSTRY COMPETITIVENESS

SPEED UP ADVANCED ICT SERVICES

SUPPORT SUCCESSFUL R&D ACTIVITIES

5G PPP

## CONTRIBUTION

BETTER QUALITY OF LIFE AND SERVICES

OVERCOME DIGITAL GAP IN EUROPE

OPEN NEW INNOVATION OPPORTUNITIES

1000 times higher wireless area capacity

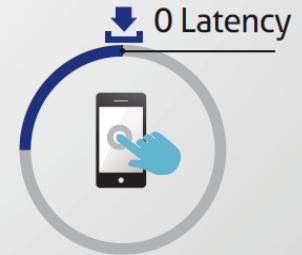

connecting 7 billion people

connecting 7 trillion things

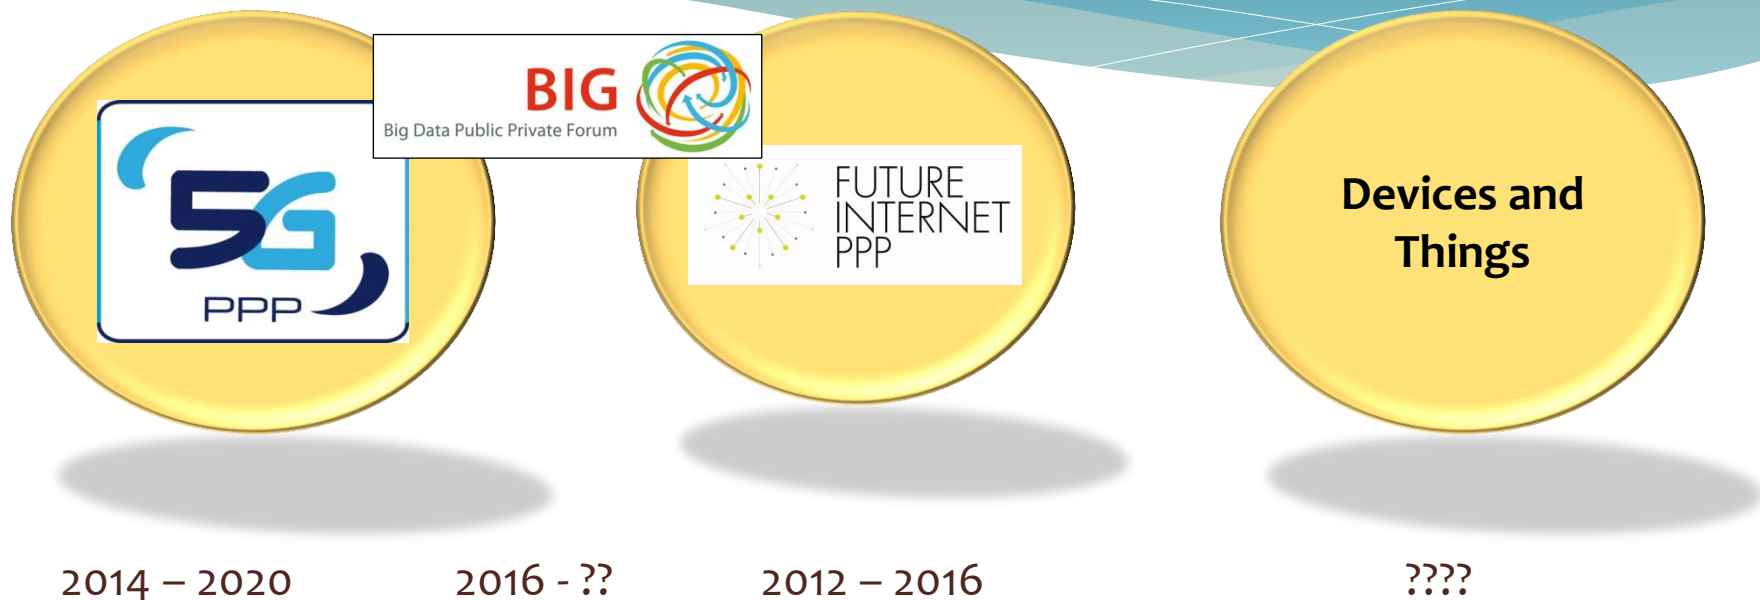

save 90% energy

zero perceived downtime

# Developing the Internet

# Conclusions

- \* **The FI-PPP is short term** – today's internet
  - \* It may miss its goal by over concentrating on SMEs
- \* **The 5G-ppp is critical for enabling a viable and capable future**
  - \* The long term perspective may be damaged by H2020 short-term impact requirements
- \* **Big data is important** as it impacts both infrastructure and Services
- \* **The real Applications and Services initiative is still missing**
- \* Several cycles of research initiatives addressing:  
**“Networks > Services > Networks > Services”**  
are needed to achieve the accelerated and synchronised evolution to the **Networked Society of 2020** that is needed to **keep Europe competitive** and give the **advantages to European society**.
